PROFESSIONAL SUMMARY

Frontend Engineer with 3.5 years of experience designing scalable React and Next.js applications for enterprise software products. Specialized in frontend architecture, reusable component systems, performance optimization, and modern web application development using TypeScript. Strong ownership mindset with proven experience establishing frontend projects from scratch, designing maintainable architectures, leading feature implementation independently, reviewing code, and delivering production-ready software. Passionate about building scalable frontend systems that improve developer productivity and long-term maintainability.

CORE TECHNOLOGIES

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, ShadCN UI
Architecture	App Router, SSR, Component-Driven Development, Code Splitting, Lazy Loading, Clean Architecture, Performance Optimization
State Management	Zustand, Redux, Context API, TanStack Query
Backend & APIs	REST APIs, GraphQL, Node.js, Express.js
Visualization & DevOps	Apache ECharts, CesiumJS, Mapbox GL, Azure DevOps, GitHub Actions, CI/CD, Git

PROFESSIONAL EXPERIENCE

Software Engineer — Antaris Space India Pvt. Ltd.

Feb 2023 – Present | Pune, India

- Frontend Foundation Architecture:** Established the frontend architecture for **Antaris V2** using Next.js App Router and TypeScript, creating a scalable foundation for future product development.
- Reusable Component Library:** Designed reusable component architecture consisting of **18+ shared React components** used across multiple simulation workflows.
- End-to-End Delivery:** Independently owned complete feature delivery from technical planning to production deployment, developing **15–20 enterprise application screens** for satellite simulation and mission planning.
- Telemetry Dashboard Migration:** Led the migration of telemetry dashboards from Grafana to reusable **Apache ECharts** implementations, integrating **7 backend APIs** across **50+ telemetry panels**.
- Engineering Standards & CI/CD:** Conducted regular code reviews promoting clean architecture and reusable patterns; contributed to Azure DevOps CI/CD pipelines and GitHub Actions workflows.

Tech Stack: React.js, Next.js, TypeScript, TanStack Query, GraphQL, CesiumJS, Apache ECharts, Azure DevOps.

Software Engineer — Geminus Tech Pvt. Ltd.

Nov 2022 – Present | Pune, India

- Corporate Portal Engineering:** Built the company's corporate website from scratch in collaboration with the UX team using React.js and Next.js.
- Scalable Architecture:** Designed reusable frontend components following scalable architecture principles, delivering responsive, high-performance UIs.
- Agile Execution:** Collaborated within Agile teams using Azure DevOps development workflows and maintainable code standards.

ARCHITECTURE HIGHLIGHTS

- Designed scalable React component architecture for enterprise apps.
- Built reusable UI libraries improving development consistency.
- Established modern project structure using Next.js App Router.
- Implemented scalable API integration patterns using TanStack Query.
- Optimized frontend maintainability through modular architecture.
- Contributed to production CI/CD workflows using Azure DevOps.

PROFESSIONAL RECOGNITION

Performance Optimization Award

Recognized for delivering optimized implementations & application speed.

Ownership Award

Recognized for independently leading complex feature implementation end-to-end.

EDUCATION

B.Tech in Computer Science & Engineering

Calcutta Institute of Technology (MAKAUT)

CGPA: 8.0 / 10.0 | Graduated: 2020
